

Model 2401

Power Surge Protection for Cat 5e/6

- Protects equipment from transient voltage and power surges
- Compatible with any RJ-45 terminated cable
- Compatible with 10/100 Base-T networks
- Compatible with most audio/video transmissions on Cat 5e/6 cable
- Single-channel or 12-channel, rack-mount configurations

What are Transients?

Transients are brief but powerful surges sometimes exceeding 100,000 volts, originating from lightning, power system faults and utility grid switching or even internal sources such as load switching.

Model 2412

Protect High-Value Equipment

AC power conditioners and surge protectors are a vital part of any high-value equipment installation, but they do not offer protection from induced current entering the system through long runs of UTP cable. Unshielded twisted pair cable can act as an antenna, making equipment vulnerable, especially in high-lightning areas. Our 2400 Series products complete your defense against power surges.

MODEL 2412 FEATURES:

- Protects twelve channels, at one end of each Cat 5e/6 cable
- Convenient rack mount for front or rear installation
- Steel construction

MODEL 2401 FEATURES:

- Protects one channel, at one end of a Cat 5e/6 cable run
- Mounts to any flat surface
- Durable plastic case

SPECIFICATIONS:

Model Numbers 2401, 2412
 Dimensions (2412) 19 x 3.5 x 2.5 inch (480x90x64mm)
 Dimensions (2401) 5.5 x 3.25 x 1.75 inch (140x83x45mm)

I/O Connectors (2412) 12x RJ-45 Input / 12x RJ-45 Output
 I/O Connectors (2401) 1x RJ-45 Input / 1x RJ-45 Output
 Warranty 5 years, repair or replacement
