

# Introducing The Intelix DIGI-HD-COAX

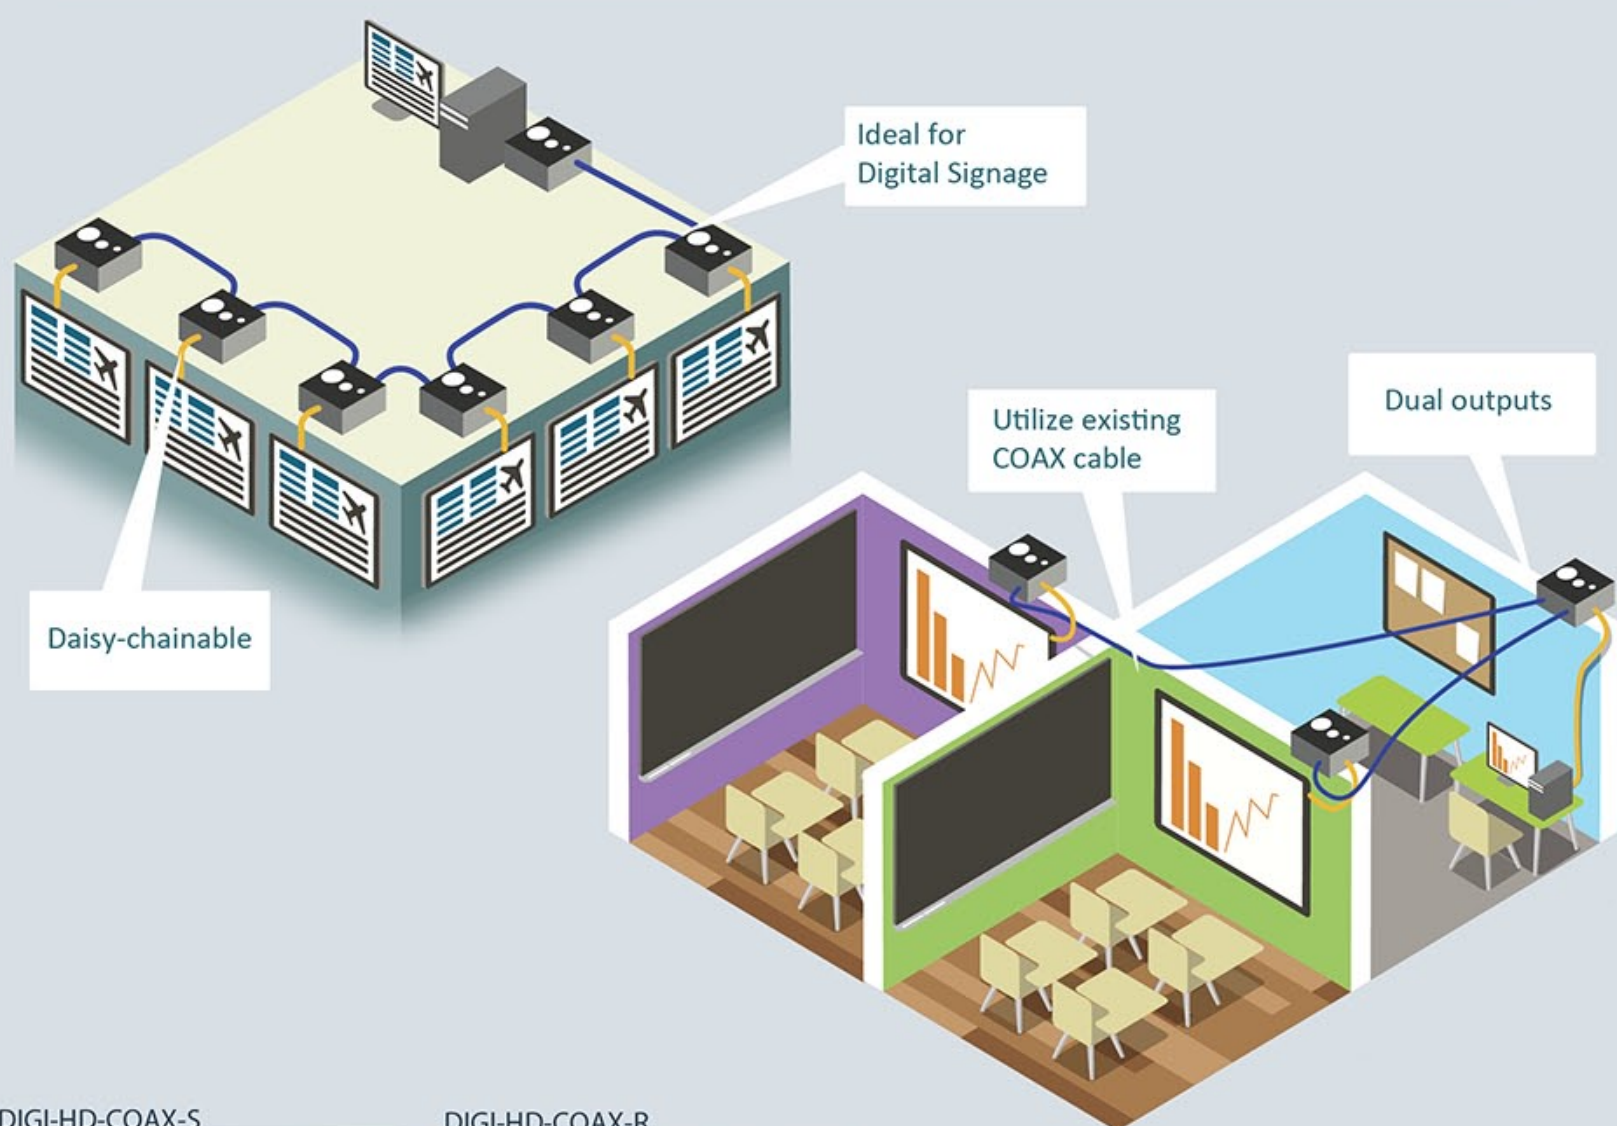

## Features

- Extend HDMI over a single coaxial cable
- Built-in buffered 1x2 distribution amplifiers
- Link up to 10 displays from one transmitter
- BNC or F connectors
- HDMI 1.3 and HDCP compliant

### Coax is easy to install and hard to abuse. Why not leverage it for HDMI deployment?

Designed for demanding digital signage and commercial audio-visual applications, the DIGI-HD-COAX employs Intelix's industry-leading digital processing to transmit high-definition HDMI signals over a single RG6 or RG59 cable. Plus, built-in distribution amplifiers make whole system deployment a breeze.

# Introducing The Intelix DIGI-HD-COAX

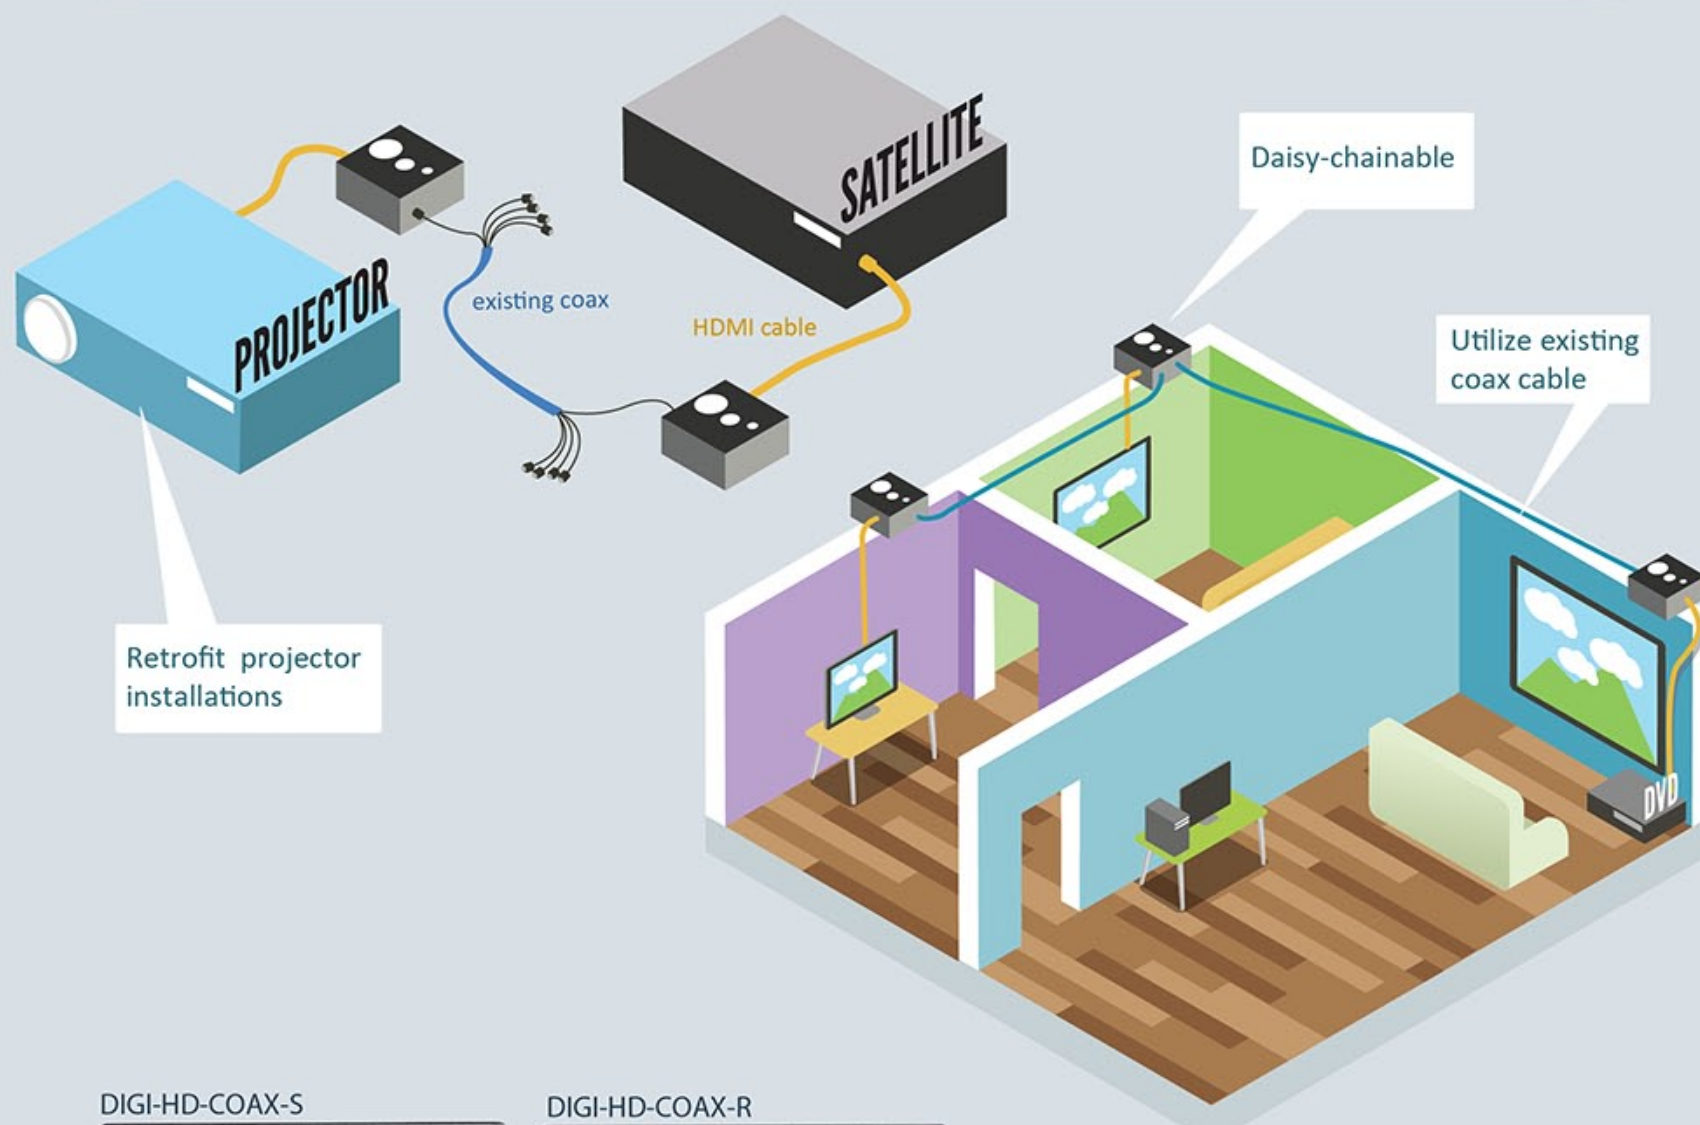

## Features

- Extend HDMI over a single coaxial cable
- Support two simultaneous displays
- Daisy-chain up to five remote rooms
- BNC or F connectors
- HDMI 1.3 and HDCP compliant

### Your building already has coaxial cable installed. Why not leverage it for an HDMI upgrade?

Designed for demanding commercial and residential audio-visual applications, the DIGI-HD-COAX employs Intelix's industry-leading digital processing to transmit high-definition HDMI signals over a single RG6 or RG59 cable. Plus, a built-in amplified splitter provides seamless in-room viewing.
