

WIRELESS HDMI TRANSMISSION

PRODUCT SPOTLIGHT

DESIGNED SPECIFICALLY FOR THE PROFESSIONAL AV INSTALLATION

The Intelix SKYPLAY-HD supports high-definition video up to 1080p/60Hz and is ideal for residential, commercial, corporate A/V, education, digital signage, hospitality, and house of worship applications.

Each transmitter is compatible with up to six receivers for larger deployments, and multiple channel assignment allows up to 20 independent networks to coexist within each 100 foot radius.

SKYPLAY-HD

The SKYPLAY-HD seamlessly distributes HDMI high-definition audio/video up to 100 feet in both point-to-point and point-to-many configurations.

WHDI and AES 128-bit encrypted processing ensure the integrity of digital signals and real-time processing (less than 1 ms delay), whether transmitting in open spaces or through light construction, such as framed drywall walls.

- Wirelessly distribute HDMI up to 100 feet
- Signals can go through standard sheet rock walls
- Up to 20 receivers per transmitter
- Less than 1 ms latency
- WHDI and HDCP compliant
- 5 GHz operating frequency
- Selectable eight channel assignment
- Built-in surge protection
- AES 128-bit encryption

DON'T FORGET THE HDMI CABLE!
